DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 1-25 in the reply filed on 16 May 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Conclusion

3. This application is in condition for allowance except for the following formal matters:

Please refer to the above Office action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

4. Claims 1-25 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art of record neither shows nor suggest a method for making an EL device comprised of, in part, thermally transferring a transfer layer with a first emitter on a receptor and disposing a second emitter layer on the transfer layer, along with the rest of the limitations of the claim.

Regarding independent claim 9, the prior art of record neither shows nor suggest a method for making an EL device comprised of, in part, providing a non-patterned layer with a first emitter and thermally transferring a transfer layer with a second emitter on the first emitter layer along with the rest of the limitations of the claim.

Regarding independent claim 16, the prior art of record neither shows nor suggest a method for making an EL device comprised of, in part, providing a solvent-susceptible layer and disposing a first emitter layer and a non-volatile component on the solvent-susceptible layer and disposing a second emitter layer thereafter, along with the rest of the limitations of the claim.

Regarding independent claim 21, the prior art of record neither shows nor suggest a method for making an EL device comprised of, in part, providing a solvent-susceptible layer with a first emitter and disposing a second emitter layer with a non-volatile component on the solvent-susceptible layer, along with the rest of the limitations of the claim.

Art Unit: 2879

Due to their dependency, claims 2-8, 10-15, 17-20, and 22-25 are necessarily allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
